regulation of chemokine production long-chain-acyl-CoA dehydrogenase activity

ubiquitin-like protein conjugating enzyme activity

regulation of Rac protein signal transduction

ubiquitin conjugating enzyme activity

retrograde axonal transport of mitochondrion serine-type endopeptidase inhibitor activity

sphingolipid floppase activity number of genes extrinsic component of postsynaptic density membrane thiolester hydrolase activity endosome membrane macromolecule depalmitoylation 120 palmitoyl-(protein) hydrolase activity 160 palmitoyl hydrolase activity p.adjust phosphatidylcholine transporter activity regulation of GTPase activity 0.00035 positive regulation of hydrolase activity 0.00030 phospholipid transporter activity 0.00025 0.00020 positive regulation of GTPase activity regulation of cholesterol efflux

lipid transporter activity

lipid transport

organic hydroxy compound transport bile acid and bile salt transport

lipid localization

xenobiotic transmembrane transport

ATPase-coupled transmembrane transporter activity

active transmembrane transporter activity xenobiotic export primary active transmembrane transporter activity
